

Announcement of Krify Summer Internship Program for E3 Of 2017

I am glad to inform that our **Summer Internship Program for 2017** at [Krify Software Technologies Private Limited](#) will be starting from **April 2017**. Our internship has helped several interns earlier with a track record of 100% placement in reputed MNC companies where internship project played a vital role.

Our Internship Program has been designed in a way to provide the maximum IT industry exposure to the student. This internship will provide the students with an opportunity to explore the technologies with an industrial development approach through the medium of live projects, in following domains:

- Mobile Apps, Internet of Things, Wearable Apps, Drone Apps, VoIP Apps and Data Analytics.

Two months long exposure to an IT Company and its operations of live projects, adds an enhancement in the student's progressive career. Please convey this information to all your students from Computer Science and Information Technology streams.

For all the details regarding the internship and for registering online please find the below link.

<https://www.krify.co/internship/>

We would like to provide the internship for as many students as possible, but we have to limit the registration. So, I request you to encourage your students to enroll in this internship program as early as possible, as we have limited slots.
