# We are a Certified Troup

ideyaLabs is officially recognized for its expertise and capability in delivering IT services and solutions to customers.

# Vision & Mission

## MISSION

Our mission is to develop long-term trusting relationships with our clients, our vendors, our people, and our communities through inspired technological solutions and products

## VISION

Harness the power of people, technology, ideas, and solutions to foster the growth of our clients, our people, and the communities that we all live in

This is a great place to work with some smart brains shaping the future of technology. A fast-paced environment constantly buzzing with ideas and energy. What I really like about ideyaLabs is the freedom to express your views.]

**Naresh**

ideyaLabs assists employees in growing within the organization across departments. They also believe in being digitally ahead and have included it in their company values.

**Ramanjaneyulu**

I am working as a Senior Software Engineer in ideyaLabs for 1 year, an Amazing company, that provides a work-life balance. I can be my complete self at work unapologetically without the fear of being reprimanded for it.

My role is extremely interesting! I struggled a little because I was new to the platform, but my team was there to help me at every step. I was given the opportunity to wear various hats, which allowed me to experience various roles within the same team.

It's been more than a year @ideyaLabs and got a chance to work in the React & JavaScript area. These projects have challenged me to learn faster and have given the company insight as to what you can do better at and excel.

**Suyash**

I've always had good opportunities to advance within the organization. Along with it, there is a lot of learning about new roles and responsibilities through various learning programs, which has been extremely beneficial to me.

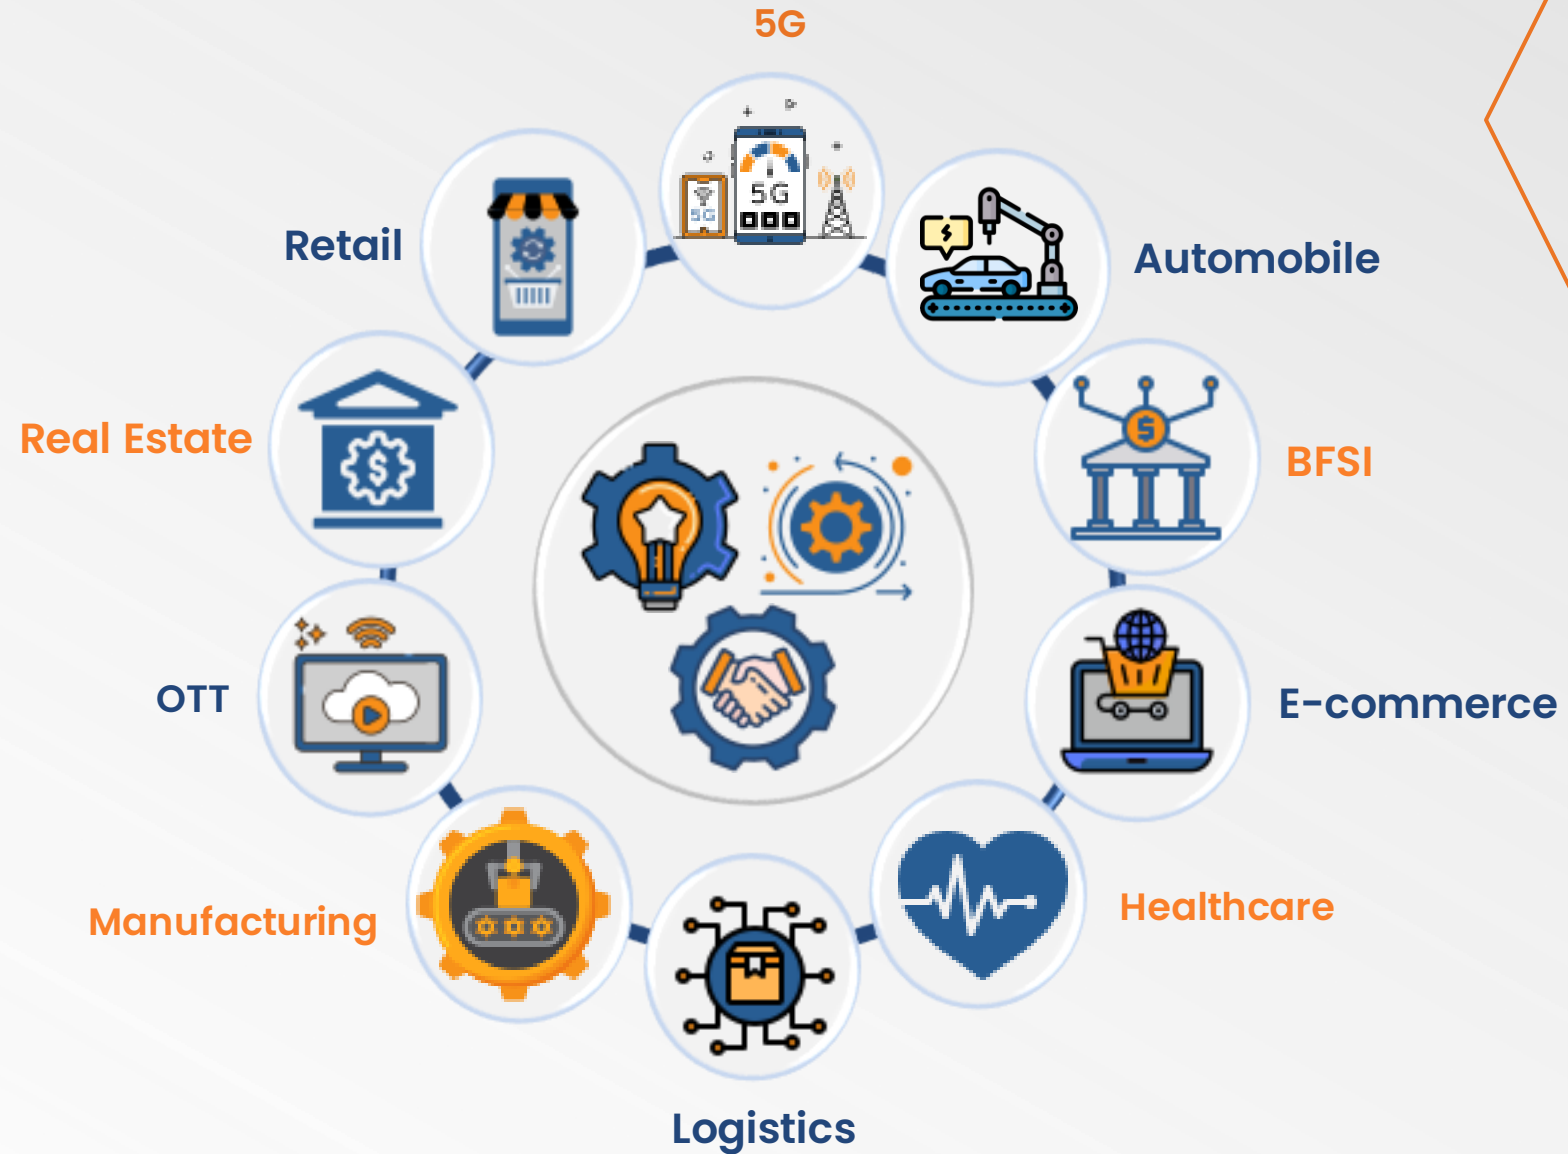

# We are a technology company at the core

-  Product Engineering
