

The world has very few devices left to fight COVID-19 with, but the technology remains one of them. Students of the B15 batch came up with an initiative known as **“Tele-Mitigation service(TMS)”**.

The Tele Mitigation service is a technology-driven solution, which obtains the information from the students about their health status like flu-like symptoms and helps to endorse better precautions during this pandemic.

*“The Student Welfare Office (SWO) has partnered with team TMS for the smooth execution of exams and to curtail the spread of COVID 19 within the campus”.*

To unleash the full potential of TMS, the administrative staff, teaching, and non-teaching staff, and students of E-4 are requested to help in securing medical information by filling the form provided in the notice attachment.

During the initial stages of the COVID-19 outbreak, the human transmission was commonly taking place because the public was unaware of these risk factors, and infected individuals were not isolated, and were therefore spreading the virus unknowingly to other individuals. At a time when there is a strident opposition to the conduct of exams during this pandemic, **JNTU-H** affiliated CMR (Autonomous), testing COVID 19 positive on 11/09/2020(Friday) have heightened fears further. To combat the situation at our University, the team **TMS** plays a crucial role.

***So, in a challenging time like this, it is our responsibility to give authenticated data and prevent the spread of COVID 19.***

The processes involved in the functioning of TMS are:

- 1) Pooling of data**
- 2) Dissemination of Data**
- 3) Deployment of Task Force**
- 4) Updating of Data.**

Team TMS assures everyone that fills our survey that their personal information will remain undisclosed to any third party. So, we urge every person to fill it with absolute honesty and without fear.

**Pandemic is not a word to use lightly or carelessly.  
It is a word that, if misused, can cause unreasonable fear, or unjustified  
acceptance that the fight is over, leading to unnecessary  
suffering and death."**

**- Dr. Tedros**

**Take** the survey now.
