- **Intermediate / Class XII:** Minimum 70%
- **B.Tech:** Minimum 60% CGPA/percentage, as applicable.

3. Technical Domains

The internship may involve the following areas:

- Signal Integrity and Power Integrity (SI/PI) simulations.
- High-speed interfaces such as DDR, USB and Ethernet.
- Embedded hardware design using microcontrollers and microprocessors.
- Sensors, power management ICs and communication protocols such as SPI, I²C and UART.
- Board bring-up, debugging and hardware validation.
- AMD FPGA and NXP processor-based designs.

4. Selection Process

1. Paper-based test – Basic Technical Round.
2. Personal and Technical Interview.
3. HR Interview.

5. Important Agreement Condition

The company has specified a **three-year agreement, inclusive of the internship period**. Students must carefully review and understand the agreement conditions before registering.

6. Registration Deadline

Registration Link: <https://forms.gle/6wToLmzktZjmEiem8>

Last date to register: 19 October 2026.

Interested students must submit their details through the Google Form shared by the Training & Placement Office within the stipulated deadline. Registration does not guarantee selection.

Students are advised to verify their eligibility and register only if they are genuinely interested in pursuing this opportunity.
