Job Description

Knowvation Learnings is seeking motivated and curious early-career developers to join their product and engineering teams.

The role offers hands-on exposure to:

- End-to-end software development lifecycle
- Design, development, testing, deployment, and support
- Collaboration with cross-functional teams
- Building scalable and user-centric digital solutions

This is an excellent opportunity to gain valuable experience and build a strong software engineering foundation.

Technical Skills:

- Familiarity with programming languages: Java / C# / .NET / Python / SQL
- Basic knowledge of Git (version control)
- Fundamental understanding of cloud technologies

Other Skills:

- Good communication
- Team collaboration skills

Student Requirements

- Resume submission
- Updated LinkedIn profile
- **Completion of both application forms is mandatory**

Upon submitting the Google Form, you will receive the company's official registration link. **Both registrations must be completed** to be considered for the Campus Recruitment Drive.

Link to Apply (Form-1): <https://forms.gle/c3rC8ZqvdZpRJQU8>

Interview Procedure

1. **Coding Round**
2. **Personal Interview**
3. **Project Building Assessment**

Registration Deadline

The registration window will **strictly close on 23.11.2025**.
Students must complete **both forms** before the deadline.

Students must provide accurate details and ensure timely submission to be considered for the recruitment process.
