**About the Role:**

We are seeking a highly motivated and skilled Full-Stack Developer to join our dynamic team. In this role, you will be responsible for the design, development, and maintenance of high-quality web applications using a robust technology stack. You will work closely with cross-functional teams to translate business requirements into technical solutions and deliver exceptional user experiences.

Responsibilities:

- Design, develop, and maintain RESTful APIs using Node.js and Express.js.
- Develop and maintain client-side applications using Angular.
- Design and implement database schemas using MySQL and MongoDB.
- Write clean, well-documented, and maintainable code.
- Perform unit testing and integration testing to ensure code quality.
- Troubleshoot and debug applications.
- Participate in code reviews and provide constructive feedback.
- Stay up-to-date with the latest technologies and industry trends.

- Collaborate effectively with cross-functional teams (e.g., product managers, designers, QA).

Qualifications:

- Strong foundation in Computer Science fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Databases.
  - Proficiency in JavaScript: Including core concepts, ES6+ features, and asynchronous programming.
  - Understanding of web development concepts: HTML, CSS, and basic front-end frameworks.
  - Exposure to Node.js and Express.js (or similar frameworks) is a plus.
  - Familiarity with relational databases (MySQL) or NoSQL databases (MongoDB) is a plus.
  - Experience with Git or other version control systems is a plus.
- Excellent problem-solving and analytical skills.
- Strong communication and interpersonal skills.
- Quick learner with a strong desire to learn and grow.
- Passion for technology and building web application Bonus Points (Not required):
  - Familiarity with cloud platforms (AWS, Azure, GCP).
  - Familiarity with Agile development methodologies (Scrum, Kanban).
  - Familiarity with containerization technologies (Docker, Kubernetes).
  - Familiarity with testing frameworks (Jest, Mocha, Jasmine).
