Registration Link: <http://hub.rgukt.ac.in/hub/tnp/register>

Eligibility criteria:

Branches: **Civil & Mechanical Engineers**

CGPA: Throughout Academics **minimum 6 CGPA**

Designation: **Trainee engineers**

CTC: **INR 2,40,000 per annum**

Company Profile

Anuhar Homes is a 12-year-old fast growing, high quality residential and commercial spaces provider in the city of Hyderabad. With about a 1 Million Square Feet already constructed, 1 Million Sq. Ft under construction and other 1 Million Sq. Ft projects in pipeline, it has created landmark residential properties and now venturing into commercial towers in Hyderabad. It is known for its quality and design as well as being an end-to-end integrated real estate Company with its own property management services as well.

They have a professional board of management that has experts from different fields across the Industry. More about the company can be found on www.anuhar.com. It has a top-notch team of structural engineers, architects, interior designers, civil engineers and project managers in-house to run the show. To support the growth from the current 120-member team to 200-member team in the next one year, it is on an aggressive path of expansion.

Job Role & Requirements

Selected candidates will be taken in as **Trainee engineers** and placed in departments of construction, quality, project management and supervision. They will be allocated to the projects currently in progress and will work on-site and deliver while learning.

Those with a sound understanding of the subject, a passion to create residential marvels and urge to learn something new every day will fit the bill. Over the years, the path for growth for these entry levels will be to eventually move and head departments in construction design, supervision, project management and other areas based on their skill and commitment.

Selection process

They will have a written test followed by a Technical Interview & Personal Interview as part of our campus selection process.

All selected candidates will be offered the 6-month internship with Anuhar Homes in our projects along with an internship stipend.
