My interview experience with TECH MAHINDRA.

My experience was awesome.... My written test went well. Then I entered in to the technical round. Questions posed to me in that round are completely based on my stream - mechanical. "Thermodynamics" is the topic from which questions are asked to me & they are :-

→ State 2nd law of Thermodynamics?

→ What is Entropy?

Questions were also asked from engineering Mechanics

→ Law of Conservation of energy?

→ Newton's 3 laws of motion?

Later on the topic changed on to my Internship project.

HR Round: After clearing the technical, I have undergone HR & the questions posed are :-

→ Where do you want to see yourself in ^{the} next 5 years?

→ Being a Mechanical engineer, why do you ^{want to} choose software?

With this I had completed my Interview.

My strongest suggestion is one need not fear from whatever stream he may come from. Your stream in B.Tech is not at all a hurdle for you to crack the software companies.

→ First of all, be confident of yourself & be thorough with your internship project. If this is done then 80% of the success is yours.

→ Sit firm during the interview & answer boldly to the questions posed but never give answers doubtfully making the interviewer to lose impression on you.

Tips to clear written test :-

→ Prepare well for aptitude & English. Follow R.S. Agarwal book.

→ Time - Management is the most important factor to clear the written-test.

→ You will have to score equal marks in aptitude & english to clear the written test.

Questions asked in written test :-

* Aptitude:

- Problem on ages
- Alligation / mixtures
- Partnership
- Simple & compound Interest
- Series.

* English:

- Articles
- Prepositions
- Building Verbage
- Sentence formation
- Passage

* Attempt Mock-tests. This will help you alot to build up confidence in yourself.
