My interview experience with   TECH MAHINDRA

Questions that I have faced in Technical Round :

i) Tell me about yourself

2) What are your favourite subjects in CIVIL ENGG stream [Top 2]. Explain briefly what it exactly deals with

3) Questions were even posed from my RESUME regarding the extra-curricular activities

4) Do you have any idea regarding the subjects related to IT stream

5) If Yes, Questioned on the subject [For me it's on DOA Design of Algorithms & C-Language basics]

6) What is your daily routine

7) Finally, its about our interest in going for higher studies [M-Tech] etc

My suggestion is that don't so yes when you come across such questions. Technical round is very simple and the interviewer was very cool & friendly enough. So don't be afraid of being a non-core student.

HR Round :

1) Why have you choosen TECH-MAHINDRA for a job ?

2) How will I get benefited if I hire you?

3) What are your Strengths ? Questioned on our strengths to explain with some experiences / examples.

4) What are the areas of your development ? [It means our weaknesses we have written before

5) Question on ESSAY writing which we have written before interviews.

⇒ Be confident enough while answering & we will be done.
