CodeVita Season VI - Open for Registrations!!

by Tanvi Upadhyay · Posted: 24th March, 2017

It's been an awesome journey for the past 5 seasons. We saw the CodeVita envelope expand from

- ~27K registrations in Season 1 to ~260K registrations in Season V
- 1 country in Season 1 to 40 nations in Season V
- 4 supported languages in Season 1 to 10 supported languages in Season V
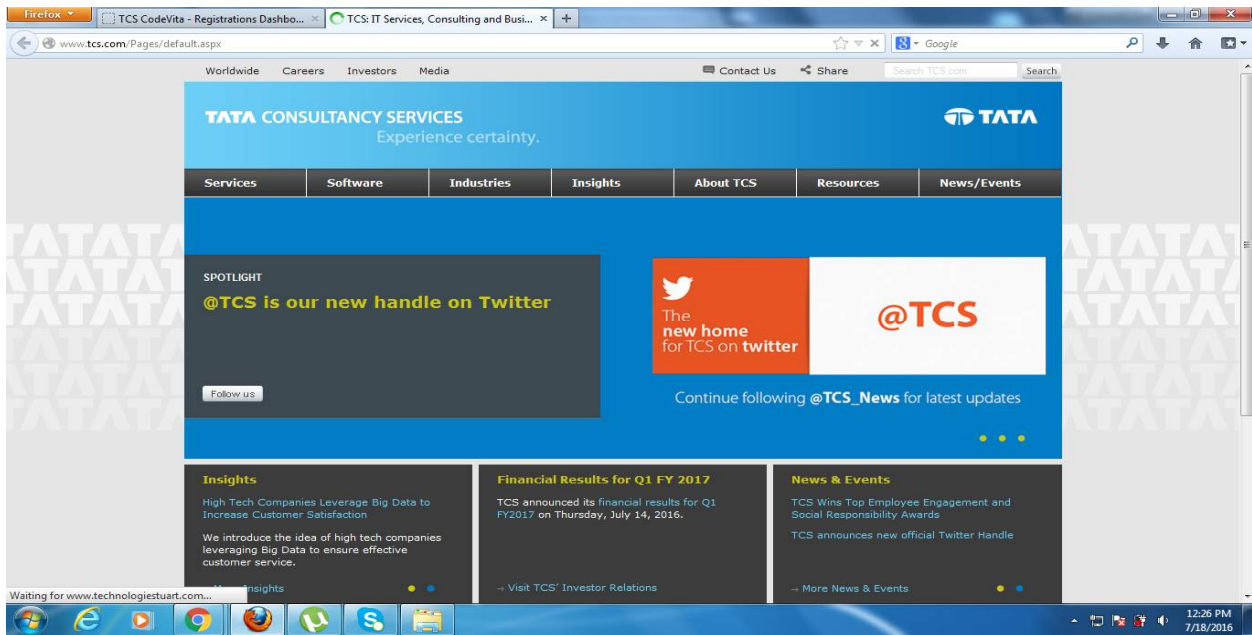

'Code is 21st Century Oxygen'

Rightly said in the above quote, I am sure all the programmers here would agree. With Competitive programming being the buzz word with coders, CodeVita is also scaling for new milestones. Last season was an exciting one and this season we are looking to double it with different rounds and tougher challenges. This year we will be conducting zonal rounds for the India phase and the qualifiers from this round will move to Round 2. CodeVita Season VI also supports 10 languages similar to previous seasons.

Last year we attempted a crowd-sourcing exercise to generate programming questions. Some of the questions you saw last year were contributed by TCSers working on client projects. Based on the success of last year we have now institutionalized this practice and you can expect a wide range of questions from several areas. Some of the prominent areas that one could expect questions on this year are, Game programming and Dynamic programming.
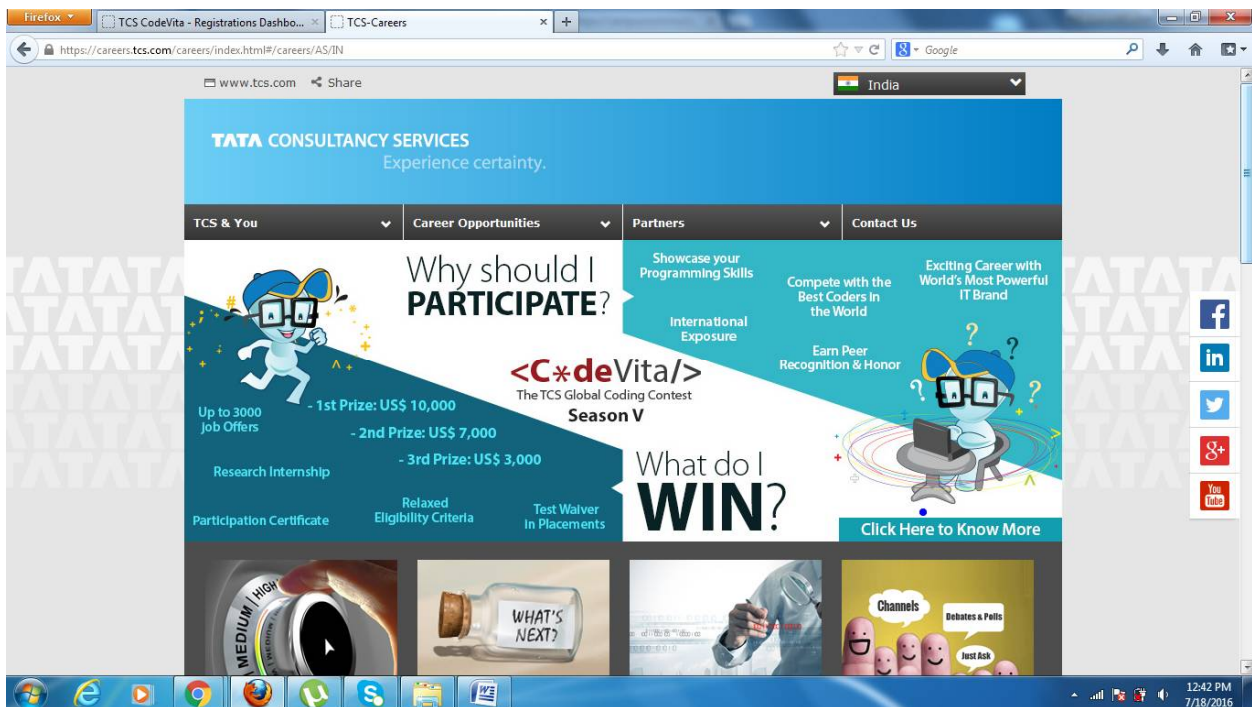

Put on your coding hats, perfect your programming skills and register for the new season of CodeVita now!

Step –by-Step process for Code Vita:

Step-1:-

Step-2:-

This has *transformed* us from a Pan India Coding Contest to a Global One!

Okay, what is CodeVita?

CodeVita is world's largest coding contest being organized every year by TATA Consultancy Services Limited. The main objective for the contest is to identify passionate coders across the globe and sharpen their programming skills through some real-life computing practices. TCS also wants to promote coding as a Sport via this contest.

So who is Eligible to Participate?

Students from Institute across India in under graduate/ post graduate disciplines from engineering/science background with any specialization are eligible for this contest.

What is the Format of the Contest?

CodeVita is a team contest. A team must have 2 members from the same Institutes (can be from different year of passing and specializations). The contest will comprise of 2 rounds of coding before Global Round where top teams from across the world will fight for the Prestigious Title.

Hmmm why should I Participate?

1. To Showcase your *Programming Skills*
2. To Compete with the *Best Coders in the World*
3. To Earn *Peer Recognition and Honor*
4. To Explore *Exciting Career* with *World's Most Powerful IT Brand*
